7-Single-source implementation
Comprehensive implementation of the ISO norms only by GERMANCERT.

8-Flexibility
Custom-made services that meet your individual situation and specific requirements.

9-Fixed fees
ISO certifications at fixed prices. No hidden costs.

THE CHALLENGE OF OCCUPATIONAL
PROTECTION AND SAFETY

Health Safety and prevention of employees are essential prerequisites for the company's success. ISO 45001 Occupational Safety and Health Management (OHS-MS) certification provides a recognized, systematic framework to identify, control and reduce potential risks in all areas of your company. This includes the development and implementation of an OHS policy and the definition of OHS objectives. The aim of this standard is to ensure safety in the working environment and to minimize – and, at best, avoid risks that can lead to injuries and illnesses in the workplace.

ISO 45001 — Formulates regulations to improve occupational health and safety

The new ISO 45001 norm (developed from BS OHSAS 18001: 2007) enables companies to develop and continuously improve their own occupational health and safety management risks and services. The system includes core organizational processes and involves the management and employees as well as customers. If you are already OHSAS 18001 certified, you can have your system migrated to ISO 45001. Start this process with us today to take advantage of the benefits at an early stage.

WHY APPLY FOR AN ISO 45001 CERTIFICATION?
If you seek to ...

- reduce health and safety risks at work and protect your employees from potential harm,

- reduce the risk of downtime and costs of business interruptions, insurance premiums and claims for damages,

- want to better respond to legal or customer-required compliance requirements and achieve recognition for achieving an international benchmark, while seeking increased profitability and productivity through reduced employee absence and turnover, as well as reduced overall costs in incidents,

then a certification according to ISO 45001 offers you many advantages. Proof of ISO criteria is not just a piece of paper, it is an essential contribution to optimizing your core operational processes and reducing security risks.

GERMANCERT's WAY TO PROCEED

INITIAL SITUATION / STATUS QUO ANALYSIS

Our auditors conduct an analysis of the initial situation. The internal processes, practices and management systems are reviewed. After that, you'll know where your company stands in relation to the requirements of ISO 45001.

AUDITING

Based on the analysis of the status quo, GERMANCERT supports you throughout the entire auditing process with dedication and care.

CERTIFICATE AWARD

Once your organization meets the demands of the Norm ISO 45001 after the audit has been conducted, you will be awarded your ISO certificate.

Your organization benefits from this course of action by:

• preventing deaths, accidents at work and illness among employees,

• improving and providing a safe and healthy workplace for employees and other persons under your responsibility,

• improving health and safety performance and management of their risks,

• complying with relevant legal requirements and preventing criminal prosecution.
